

Healthy Facts

Ideas for team generated poster concepts

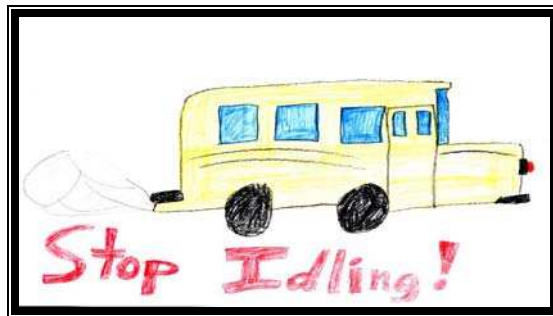

Buses are good for the environment because they produce less pollution than if everyone on the bus rode in a car. However, their exhaust fumes are still harmful to you and the environment. **Diesel** fuels buses just like food fuels your body. The diesel fumes only pollute when the bus is turned on. Because of this we want the buses to be turned on only when they are actually moving. **Idling** is when a bus's engine is on but the bus is not moving.

Include at least 3 of these facts on your poster

- Diesel exhaust increases your chance of getting cancer.
- Soot from the exhaust increases your chance of dying from heart or lung disease.
- Diesel exhaust makes asthma worse.
- The less a bus idles the healthier everyone will be.

Slogan Ideas: Clean buses = healthy kids
Pollution hurts our health
Love your lungs - don't idle!
